

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Sustainable Short Duration Corporate Bond Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Bond Funds II ICVC ISIN: GB00BLDC8278

Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective: The Fund's financial objective is to achieve a total return and outperform, after the deduction of charges, the ICE Bank of America Merrill Lynch Sterling Non-Gilt (1-5 Years) Total Return (GBP Unhedged) over rolling 5-year periods.

The Fund's sustainability objective is to invest in companies or issuers that make a positive contribution to one or more of the "Sustainability Themes" (Clean, Healthy, Safe, Inclusive), through their products or services as determined by the Investment Manager using its "Sustainability Standard" (details below).

Policy: At least 80% of the Fund will be invested in investment grade corporate bonds denominated in sterling or hedged back to sterling, of which at least 70% will have a duration of less than five years. Index linked bonds, securitisations, supranational bonds, agency bonds, floating-rate notes, and asset-backed securities, denominated in sterling, or hedged back to sterling, are also included in this segment of the Fund. The maximum average duration of the corporate bonds in the Fund's portfolio will be 5 years.

The remainder of the Fund may be invested in a range of securities, including UK government bonds, preference shares, bonds with a duration greater than five years, sub-investment grade, unrated bonds, transferable securities, money market instruments and exchange-traded funds.

Overall, at least 70% of the Fund is invested in Sustainable Companies or Issuers. Up to 30% may be held in Non-Sustainable Companies or Issuers.

The Investment Manager avoids investing in tobacco and armament manufacturers, nuclear-power generators, and companies that conduct animal testing (other than for purposes of human or animal health, and/or where it is required by law or regulation), pornography production, online/ offline gambling establishments and fossil fuel extraction. The Investment Manager also applies a conflict screen using the UN Global Compact and OECD Guidelines.

The Fund's Sustainability Standard is that a company or issuer makes a positive contribution to one of more of the Sustainability Themes. To be considered, the majority (i.e. at least 50%) of company's or issuer's revenues must be aligned to these Sustainability Themes.

The Fund may also invest in a range of other assets for diversification, liquidity or efficient portfolio management ("EPM") purposes: Up to 10% in other investment funds, known as collective investment schemes; cash is unlikely to exceed 5% of assets; derivatives may be used for EPM purposes only.

The remaining portfolio will not conflict with the sustainability objective of the Fund. The Fund is actively managed.

Please refer to the Fund Prospectus or the Consumer Facing Disclosure for further details regarding the Sustainable Investment Process. These documents are available in the Fund Information section at www.rlam.com/uk.

Recommendation: The Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Concepts to understand

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Total Return A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Rolling 5 Year Period A rolling 5-year period is any period of five years, no matter which day you start on.

Duration is an investment's sensitivity to interest-rate changes measured in years.

Environmental, social and governance A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth. Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund. The Fund is ranked in risk category 3 because its simulated share price has shown a low to medium level of volatility historically. The Fund was formed by merger and the SRRI was calculated using historic data from the merging fund and may not be a reliable indicator of the future risk profile of the fund.

Risk and reward profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 3 because its simulated price has shown a medium to low level of volatility historically. The SRRI was calculated using some synthetic data and may not be a reliable indication of the future risk profile. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit Risk Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Responsible Investment Style Risk The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number of securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Charges from Capital Risk Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.35%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 5 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay. The Fund was launched on 23 November 2022 and the share class on 23 November 2022.

Past performance is not a guide to future performance and may not be repeated. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. The past performance is calculated in British Pounds, with net dividends reinvested.

Practical information

Depository: HSBC Bank plc

Additional Information: This Key Investor Information Document (KIID) may not contain all the information you need. For additional information on this fund (including the Supplementary Information Document), on other share classes of this fund and on other funds, or to obtain a free copy of the Fund's Prospectus or the annual and semi-annual shareholder reports, call the information line or write to the registered office, details of which are below. Alternatively, visit www.rlam.com. The Prospectus and shareholder reports are in English.
