

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Sustainable Growth Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Equity Funds ICVC ISIN: GB00BMV92360

Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective: The Fund's financial objective is to achieve capital growth over the medium term, which should be considered as a period of 3-5 years.

The Fund's sustainability objective is to invest in companies or issuers that make a positive contribution to one or more of the "Sustainability Themes" (Clean, Healthy, Safe, Inclusive), through their products or services as determined by the Investment Manager using its "Sustainability Standard" (details below).

Policy: At least 50%, up to a maximum of 75%, of the Fund's assets will be invested in the shares of companies. These will be businesses that are listed on stock exchanges in their respective countries. The Fund has no particular geographic focus and the companies in which it invests may be based anywhere in the world.

The Fund may also invest up to 50% of its assets in investment grade corporate bonds. Sub-investment grade bonds are limited to a maximum of 5% of the Fund's assets.

Exposure to any single company, taking account of both share and bond holdings, is limited to no more than 6% of the Fund's assets.

The remainder of the Fund may be invested in a range of securities, including UK government bonds, preference shares, bonds with a duration greater than five years, sub-investment grade, unrated bonds, transferable securities, money market instruments and exchange-traded funds.

Overall, at least 70% of the Fund is invested in Sustainable Companies or Issuers. Up to 30% may be held in Non-Sustainable Companies or Issuers.

The Investment Manager avoids investing in tobacco and armament manufacturers, nuclear-power generators, and companies that conduct animal testing (other than for purposes of human or animal health, and/or where it is required by law or regulation), pornography production, online/offline gambling establishments and fossil fuel extraction. The Investment Manager also applies a conflict screen using the UN Global Compact and OECD Guidelines.

The Fund's Sustainability Standard is that a company or issuer makes a positive contribution to one of more of the Sustainability Themes. To be considered, the majority (i.e. at least 50%) of company's or issuer's revenues must be aligned to these Sustainability Themes.

The Fund may also invest in a range of other assets for diversification, liquidity or efficient portfolio management ("EPM") purposes: Up to 10% in other investment funds, known as collective investment schemes; between 0% and 5% in cash, although there is no restriction on cash levels; derivatives may be used for EPM purposes only. A limited amount of the Fund's assets may also be invested indirectly in property, money-market instruments and deposits.

The remaining portfolio will not conflict with the sustainability objective of the Fund. The Fund is actively managed.

Please refer to the Fund Prospectus or the Consumer Facing Disclosure for further details regarding the Sustainable Investment Process. These documents are available in the Fund Information section at www.rlam.com/uk.

Recommendation: The Fund may not be appropriate for investors who plan to withdraw their money within 3-5 years.

Concepts to understand

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Capital Growth The rise in an investment's value over time.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Derivatives are typically used to hedge the relevant share classes.

Equities Securities that represent an ownership interest in a company.

Environmental, social and governance A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Efficient Portfolio Management (EPM) Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. The use of these instruments may expose the Fund to volatile investment returns and increase the volatility of the net asset value of the Fund. EPM techniques may involve the Fund entering into transactions with counterparties where there may be a risk of counterparty default. The Fund's ability to use EPM strategies may be limited by market conditions, regulatory limits and tax considerations.

Risk and reward profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 5 because its simulated price has shown a medium to high level of volatility historically. The SRRI was calculated using some synthetic data and may not be a reliable indication of the future risk profile. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments. This Fund has a mixture of bonds, money market instruments and shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Emerging Markets Risk Investing in Emerging Markets may provide greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, high currency fluctuation, the adverse effect of social, political and economic instability, weak supervisory structures and weak accounting standards.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

Responsible Investment Style Risk The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.77%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 5 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay. The Fund was launched on 24 May 2022 and the share class on 24 May 2022.

Past performance is not a guide to future performance and may not be repeated. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. The past performance is calculated in British Pounds, with net dividends reinvested.

Practical information

Depository: HSBC Bank plc

Additional Information: This Key Investor Information Document (KIID) may not contain all the information you need. For additional information on this fund (including the Supplementary Information Document), on other share classes of this fund and on other funds, or to obtain a free copy of the Fund’s Prospectus or the annual and semi-annual shareholder reports, call the information line or write to the registered office, details of which are below.
