

AXA Ethical Distribution Fund

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label. This Fund does not pursue a specific sustainability goal and does not meet all the criteria for a sustainable investment label. However, it does consider a range of ethical considerations as part of its investment process.

Sustainability Approach

We invest 50% to 60% of the fund's net asset value in shares and 40% to 50% in bonds issued by the UK government (gilts) and cash. The shares component is invested predominantly in the UK, but we may invest elsewhere if it is considered to be in the best interests of investors.

Based on our Ethical Policy, we screen companies on several criteria to determine their suitability for inclusion in the fund, with the assistance of an external data provider. It covers the following areas:

| | | | |
|---|---|--|---|
|  Animal testing |  International military supplies, including weapons |  Fossil Fuels |  Pollution |
|  Gambling |  Biodiversity loss |  Mining |  Pornography and adult entertainment services |
|  Violations of human rights |  Unsustainable timber |  Nuclear power |  Tobacco |
|  Intensive farming |  Unfair treatment of developing economies |  Hazardous Products and Substances that harm human health or the environment |  Energy Intensive Industries |

We won't invest in companies where our research shows unacceptable levels of involvement with and/or significant revenue derived from these areas. From time to time, we may update these areas of concern. You can find a detailed outline of how we assess companies in our Ethical Policy available here: <https://axa-im.co.uk/ethical-distribution-fund/documents>.

After the ethical screen we then look at companies' financial prospects, including future growth of capital and dividend payments, quality of business model and corporate governance arrangements.

If a company we hold no longer meets this fund's ethical policies for any reason we will sell it as soon as we can, taking account of the best interests of investors.

Responsible investing

In addition to applying the fund's sustainability approach, AXA IM's responsible investing and environmental, social and governance (ESG) approach is embedded in the investment process. Our approach is built around robustly integrating ESG assessment into our investment analysis and portfolio construction based around three pillars:

Research, data and tools - ESG research helps us identify material ESG-related risks and opportunities. Our ESG research is based on quantitative ESG data as well as qualitative analysis from our own analysts on non-financial criteria of companies and issuers of bonds.

Exclusions – We apply our top-level screening policies and AXA IM ESG Standards policy to this fund.

- Top-level screening policies cover controversial weapons, climate risks, ecosystem protection & deforestation, soft commodities and tobacco.
- AXA IM ESG Standards policy includes white phosphorus weapons, violations of international norms and standards, severe controversies and low ESG quality names.

Stewardship - Our responsible investing approach includes engaging with the management of companies where we own shares or bonds when we want to encourage good practice and/or maintain ongoing dialogue. We also use the voting rights that come with share ownership. We adopt an active and impactful approach to stewardship by using our scale as a global investment manager to influence company and market practices. If we don't feel a company is responding to engagement, we have a range of escalation routes and can ultimately disinvest.

You can find a more detailed overview of our ESG policies on our website at <https://www.axa-im.com/our-policies-and-reports>
